PROJECTS

Beauty Ecommerce | github.com/BenYeung4/Beauty-Ecommerce| rocky-bayou-23584.herokuapp.com/
- Collaborated in a group project to develop an interactive Full-Stack application, a Korean beauty and skincare ecommerce store, with writing clean code, using Handlebar.js for Front-end.
- Solved challenging Back-end database models content information with the RESTful API. Configuration and controls for the admin, with the use of Multer.js to add image content for the products.
- Tools/Languages: Javascript, GitHub, Inquirer package, Node.js, Express.js, RESTful API, Handlebars.JS, MySQL, Heroku, Sequelize ORM, Multer.JS

National Park | github.com/BenYeung4/National-Park-App | benyeung4.github.io/National-Park-App/
- Utilizes Javascript to select a list of national parks based on the state that the user selected. Once a user selects a state, the national parks of that state are presented to the user along with a park's short description and a webpage link to that park to view more information.
- My responsibility was to implement the weather display with the weather API for those selected parks.
- Constructed the website to save the user's selection into the user's local machine, when the user revisits the page, the bookmarks display their past searches for an easier interface.
- Tools/Languages: Javascript, GitHub, API, Tailwind, HTML/CSS

Weather Dashboard | github.com/BenYeung4/Weather_Dashboard| benyeung4.github.io/Weather_Dashboard/
- Provides the weather forecast of the city that the user searched. Displays the date, temperature, humidity and wind speed for the next five days.
- Created from scratch, developed the HTML and CSS. Linked the weather API on Javascript, pulled the ID's of information that I would like to display.
- Tools/Languages: Javascript, GitHub, API, Bootstrap, HTML/CSS
